Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 edition. Excerpt: .also that there may be in them an element of harm. The mechanism producing the untoward effects has not been demonstrated as yet, but it may consist in the exaggeration of the pathologic process already existing by the introduction into the subdural space of a foreign substance. Marked meningeal symptoms have been observed following the introduction of serum, both in the experimental and human disease. In some instances, the spinal fluids obtained after the injection of serum have shown distinct evidences of accentuated inflammatory reaction, as indicated by increased turbidity, due to increase of cellular elements and increase in the content of albumin and globulin. That this meningeal reaction may have a deleterious influence on the already existing pathologic process in the cord and brain proper, is not without plausibility. Careful comparative study of the nervous tissues of the serum treated and the control animals may indicate whether or not this is the true explanation. PATHOLOGIC REPORT ON FORTY-THREE CASES OF ACUTE POLIOMYELITIS t H. L. ABRAMSON, M.D. NEW-YORK The morbid anatomy of acute poliomyelitis has received careful and painstaking study by a number of European pathologists. Rissler<sup>1</sup> was the first to describe the anatomic changes in the central nervous system, with a report of three cases, in 1888. The changes described were confirmed by a number of other students of the disease, chief among whom are Wickman<sup>2</sup> with a report of fourteen cases, Harbitz and Scheef with nineteen cases, and Strauss<sup>4</sup> with eight...
