STATISTICAL METHODS FOR SPEECH RECOGNITION (HARDBACK)

MIT Press Ltd, United States, 1998. Hardback. Book Condition: New. 234 x 152 mm. Language: English . Brand New Book. This book reflects decades of important research on the mathematical foundations of speech recognition. It focuses on underlying statistical techniques such as hidden Markov models, decision trees, the expectation-maximization algorithm, information theoretic goodness criteria, maximum entropy probability estimation, parameter and data clustering, and smoothing of probability distributions. The author s goal is to present these principles clearly in the simplest...

Reviews

Just no phrases to spell out. it was writtern very properly and valuable. I am very easily can get a delight of reading a written book.
-- Eric Macejkovic

The best ebook i actually study. I have got study and i am certain that i am going to going to study yet again again in the foreseeable future. I found out this ebook from my i and dad suggested this book to find out.
-- Allison Heaney
